

Globalgap statement

GEMERT, mei 2023

REGARDING

Statement from Biemans Plantenkwekerij BV to demonstrate that your plant material grown by us meets all the requirements set in Global-Gap with regard to the propagation of plant material.

Dear relation,

You hereby receive from us a declaration of the plant material for the cultivation of leeks cultivated by us, which meets the requirements as set in Directive 93/62 / EC on the marketing of propagating material and planting material of vegetable crops with the exception of seed, which are laid down in the Naktuinbouw inspection regulations. Compliance with the requirements is monitored by inspectors from Naktuinbouw. The delivery notes as you receive them from us also serve as a plant passport or health certificate. In connection with the verification of compliance with the Global gap requirements, it is important that you keep these documents. All crop protection agents used by us are registered. Proof of this is available on request.

We kindly but urge you to keep this letter with your delivery notes for Global-gap certification for the 2023 season.

Yours sincerely,

Biemans Plantenkwekerij BV
